# ANNUAL REPORT UNIVERSITY LIBRARIAN FOR THE HEALTH SCIENCES

Services provided the Library continued to improve during 1984/85 with a number of new and innovative programs. The Information Services Department ended the test periods for the LATCH (Literature Attached to Charts) programs, and the service was instituted on a regular basis for a number of interested departments. The demands on the service have increased to significant levels, and it is clear that this service fills an important need for clinical departments. The Library's Orientation Program for new students and faculty continued to be a high priority and it is encouraging to note that more Colleges are taking advantage of the Library's offer to integrate orientation and instructional programs into their formal programs. A new teaching program which has been extremely popular is the Library's training program to teach health professionals how to search online databases (especially the National Library of Medicine's MEDLINE database) at home or office using personal computers. These courses are began in January 1985, and are now being given on a regular basis. Initial training of the Library's staff was done at the NLM and the course uses instructional materials which the NLM has developed.

As happens periodically, this year saw a large number of changes in the library faculty. Junior faculty who have acquired skills and experience move on to more advanced positions, and some faculty make career changes. The Branch Librarian at Rockford left at the end of the year to enter the College of Medicine at Urbana/Champaign, and will return to Rockford for his clinical training. His knowledge of the Library and services will give him an interesting perspective as he now becomes a member of the primary user population, and we hope that he will provide feedback as he views the Library from his new perspective.

Work continued on enhancing the physical appearance of the Library in Chicago, and the recarpeting of the second floor was completed, as was the reupholstery of all soft furniture in public areas throughout the building. In the Spring, the Vice Chancellor for Health Affairs made funds available for the recarpeting of the third floor, and by the end of the years bids had been received and an order placed for the carpet. Although the Physical Plant requested a list of Spring

housekeeping projects from the Library, none of the items asked for were performed.

The budget for 1984/85 was the last which was administratively separate, and in 1985/86 the Library moves to a new arrangement where it will function as a cost center segment of the total budget for the University Library. Personnel accounts will be consolidated at the main Library but other accounts will continue to be expended from the health sciences library.

The National Library of Medicine issued an RFP for the next contract period for the Regional Medical Library Program, to cover the years 1986-1990. The new contract period calls for a greater level of cost-sharing by the University and the participating libraries, with many services being shifted to cost-recovery status. The emphasis on direct service to health professionals will bring a number of changes to the RML Network. The budgets for all Regions will decline during this contract period due to the fact that the NLM has not received new funding for this program, and increased costs for personnel, supplies and equipment. Travel funds are also reduced and there will be an increased emphasis on telecommunication to conduct the business of the Region.

The Regional Online Catalog of Books and Audiovisuals which was begun in 1980 was terminated in 1985 due to the impossibility of recovering from the input error made by BRS, and the costs of recreating the entire system and performing the reprogramming.

The Library published the eleventh edition of the Illinois Health and Science Libraries Serials Holdings List in hard copy format. The publication costs for this list are supported, in part, by a contract from the Illinois State Library. In negotiations with the State Library, the question was raised as to whether funds would be available in future for the print or microfiche publication of this list because of the State emphasis on the SILO (Serials in Illinois Libraries Online) project. Because many of the libraries which make the most use of the list as in small hospitals which will not have access to an online database, the Library has been attempting to convince the State Library that there is a continuing need for a hard copy edition of this publication. Input to the SILO project is also a problem because the Library's existing machine readable records for serials cannot be processed by the SILO system. To enter the system would require the manual input and update of all records, and the Library has declined to expend its

limited resources to redo work which has already been performed.

In 1985, the State Library proposed an expansion of the telefacsimile project which had been operating on a test basis in central Illinois. The expanded project would include a group of health science libraries, and the Library made recommendations for which libraries should be included. The statistical analysis of the projects activity will be undertaken by the RML Management Office under contract to the State Library. At the end of the year the State Library had provided all units of the Library of the Health Sciences with the necessary telefacsimile transmission and receiving machines. The project will begin in August, 1985.

Inflationary increase funds were received in the acquisitions budget, and some of these were used to help to bring the Urbana branch acquisition budget up to parity with Peoria and Rockford. Parity will be achieved in the 1986/87 budget year.

Irwin H. Pizer  
University Librarian for the  
Health Sciences

#### ASSOCIATE UNIVERSITY LIBRARIAN FOR THE HEALTH SCIENCES FOR PUBLIC SERVICES

A major issue for this report year was the resignation of the Peoria Branch Librarian following a three month maternity leave. The undersigned had assumed direct supervision of that Branch Library at the end of June, 1984, and has since spent one day per week in Peoria managing the facility. Considerable physical reorganization of the Branch Library has been completed during the year in order to accommodate additional equipment as well as new programs. The search process for filling the vacancy has been completed and the new Branch Librarian will begin on August 1, 1985.

Routine visits to the Urbana and Rockford Branch Libraries occurred as planned throughout the year. The recent announcement of the resignation of the Rockford Branch Librarian (effective at the end of August of this year) has prompted a series of orientation meetings in preparation for the interim management of that Library by the writer.

The Branch Libraries gained search access to the OCLC System this year which is a boon to their operation. Serious consideration should be given to enable them to use the interlibrary loan node of OCLC for

transacting loans of library materials not held by LCS Libraries.

The Branches also gained online access to PHILSOM this year and very soon all serial holdings for Branch Libraries should be loaded into the system. This has been long awaited and such application will clearly result in improved collection development and control of serials in the Branch operations.

The Library's education program has again received considerable attention and experienced still more success. Several End-User Training sessions have been conducted with excellent results. The Literature Attached to Charts (LATCH) program which was subsidized by a grant from the Campus Interprofessional Education Committee has been so successful and well received that the Library has agreed to continue the program at its own expense.

The reorganization of multimedia services (as described in last year's report) is now a year into implementation and has worked well. All staff involved have met several times throughout the year to identify and resolve problems, and the transition has been successful.

The Library of the Health Sciences will be included in an expansion of a statewide telefacsimile program sponsored by the State Library of Illinois. Preparations are underway to accommodate installation of the equipment once it is received. Guidelines and protocols for the program have not yet been received.

LCS Administration has informed the Library that appropriate program adjustments would be made early in the next report year which will enable our use of the statewide LCS loading program and thereby allow the entry of audiovisual and government documents holdings into the database. To date, circulation of these items from the Library have been manually transacted.

Meetings were held with administrators from the Institute for Juvenile Research (IJR) to review and clarify the working relationship between our libraries. The relationship is once again working smoothly.

Due to the absence of a Government Documents Librarian for most of the year, the examination of a concerted effort in processing documents for the Branch Libraries has been delayed. It is important that the effort be resumed as soon as possible so that Branch Library holdings can be entered into OCLC and eventually into the LCS database.

The Library continues to experience difficulty in the prompt notification of fines and bills. Meetings of appropriate staff from the Library and the Accounts Receivable unit

of the Business Office have yielded little result in remedying the problem. The problem is serious and must be resolved as soon as possible.

The final report of recommendations from the Task Force on Circulation and Interlibrary Loan Policies and Practices was submitted to the University Librarian for further action.

All Public Services Departments have worked diligently and productively in meeting the goals of the Library befitting the mission of the University. Their efforts are appreciated.

John N. Theall

Associate University Librarian for the  
Health Sciences for Public Services

### ACQUISITIONS DEPARTMENT

The highlight of FY 85 activity for the Acquisitions Department was the conversion to an automated order, receipt and accounting system (OCLC Acquisitions Subsystem) in July 1984. In March 1985, the Department provided instruction on accessing the system and viewing order and fund records to staff of the Peoria, Rockford and Urbana branches of the Library of the Health Sciences. The installation of a microcomputer (M300 Workstation) in the Department in March 1985 further contributed to more efficient processing of monograph acquisitions for the four locations of the Library of the Health Sciences.

The initial use of the OCLC Acquisitions Subsystem took place on July 1, 1984, with policy decisions, planning and staff training occurring during the previous fiscal year. The Subsystem is used to place orders, receive shipments from vendors, record vendor reports, issue claims and maintain encumbrance and expenditure balances for monograph accounts for the Chicago, Peoria, Rockford and Urbana branches. The implementation required reorganization of departmental programs as automated procedures evolved, fiscal reports were revised, and paper files phased out. Among the challenges encountered in the conversion were assigning newly automated tasks to the appropriate employee, finding adequate terminal time to complete tasks which were completely online and devising a strict schedule for staff access to the terminals. Among the rewards of conversion were increased staff participation in decision-making and problem-solving and more effective communication with branch library staffs as well as increased productivity and control over acquisitions information.

A selection program to strengthen the nutrition and women's health monograph collections was undertaken following consultation with representatives from the Department of Nutrition and Medical Dietetics and the Women's Health Exchange. Titles in the subjects of food composition, food service, eating disorders and xenobiotics have been added to the collection, as have titles on treating rape and physical abuse, aging women and health care delivery for women.

The loss of purchasing power of acquisitions funds constitutes a serious threat to the strength of the Library's collections despite efforts to augment individual subject collections. An additional 8 percent was expended on the acquisition of monographs in FY 85, but 6 percent fewer titles were purchased than in FY 84. In Chicago alone, an additional 5 percent was expended on monographs in FY 85, but 5 percent fewer titles were acquired than in FY 84. Inflationary increases and the necessity of purchasing expensive titles in the basic sciences contribute to the resulting decrease in purchasing power. In addition, the number of gift books donated to the Library of the Health Sciences decreased by 15 percent in FY 85.

Acquisitions Department goals for the future include seeking outside funding to help support collection development for the monograph collections. An evaluation of selected subjects is planned in order to identify areas of strength and areas requiring additional support. Self studies of Departmental operations will be continued, particularly in the areas of selection by subject, online vs. manual processing time and payment processing time. The Department intends to pursue continued liaison with the colleges and departments for purposes of collection building. Conducting an evaluation of vendor services, particularly approval plans, is also a goal for the future.

Kathryn A. Hammell  
Head, Acquisitions Department

### CIRCULATION SERVICES DEPARTMENT

With the merger of the Multimedia and Circulation Services Departments occurring late in FY 84, the primary focus of the past year has been coordinating what were previously two separate departments into one cohesive unit. This has entailed a review of existing procedures within both units and has resulted in departmental reorganization, staff training, reassignment of duties and the streamlining of procedures. Additionally with

the selection and collection development aspects of media materials becoming a responsibility of the Acquisitions department, much time and effort was devoted to developing procedures that would ensure a smooth flow of information between the two departments. Further review and reorganization is necessary however, and will remain a high priority for the next fiscal year.

One major highlight of the year was reinstating the liaison between the the Library of the Health Sciences and the Center for Educational Development (CED). One important outcome of this resulted in the revision of the policy for scheduling audio-visual materials for the Quarterly Film Theater sponsored by the College of Medicine. The Library now has direct contact with the M-1 Course Coordinators and therefore can meet the needs of the students and instructors.

With the installation of an IBM PC in the department, much time was devoted to learning the system as well utilizing the software programs. All statistical reports for the department are now compiled and stored on the microcomputer.

The shifting of the bound journal collection on the second floor was completed. New range signs were printed and all stack ranges were thoroughly cleaned.

The Circulation Services Coordinator was also a member of the Task Force on UIC Library Policies and Practices relating to Circulation and Interlibrary Loan. It was both an informative and enjoyable experience.

As always, the staff of the department are to be commended on a job well done. It is only through the efforts of every one in the department that we are able to provide a high quality of service to our users.

Lorraine Lazouskas

Head, Circulation Services Department

## INFORMATION SERVICES DEPARTMENT

The primary goals of Information Services are to provide information in support of University programs and instruction on effective use of library and information resources. These goals are accomplished through six programs outline below. Achievement of these goals continues to be hampered by personnel and space problems.

*Reference Desk* - Ready reference service has deteriorated and in-person and phone queries are not always answered quickly. Recommendations were made for more extensive scheduling of library technical

assistants and/or library interns at the desk to answer simple directional and publication information questions with library faculty scheduled concurrently for complex questions, online search interviews, and instruction. The objectives for next year are to improve service, make more effective use of staff, and minimize user waiting time.

*Computer Search Services* - Two new searchers were trained and the user survey results were compiled. Over 80% of the 100+ respondents indicated satisfaction with computer search services and over 50% were very satisfied. Full text databases were searched occasionally, mostly to answer reference questions. Major problems involved equipment and staff vacancies and turnover. Experienced staff spent considerable time training and consulting with new searchers. The Library's online costs were higher because inexperienced searchers spend more time online. Quality of the service is not always as good. Next year's objectives are to plan and implement a more extensive staff development program, continue to monitor quality and user satisfaction, and use the microcomputer for statistics, reporting and editing.

*Education Services* - Library orientation in the Fall of 1984 reached a few more new students, faculty and staff than in the previous year and focused more on LCS, online services, and the individual interests of each group. The major accomplishment was initiating MEDLINE training for health professionals and students. Sixty-one individuals attended the six workshops and approximately half of the participants subsequently requested passwords from the National Library of Medicine. Goals for 1985/86 include continuation and improvement of the orientation program and MEDLINE workshops and development of a credit course on information skills for pre-med students.

*Collection Maintenance and Development* - The goal of this program is to maintain a high quality reference collection that allows users and librarians to find information quickly and easily. Projects for 1985/86 include continuing to weed reference materials classified in the Dewey system shifting alphabetized indexes and abstracts, shelf reading and inventory of reference monographs, and building a core collection of patient education materials.

*Clinical Information Services* - Information Services provides two literature retrieval and delivery services for the hospital - LATCH (literature attached to the chart) and a hospital nursing staff development service. LATCH was successfully offered on the sixth,

seventh, and eight floors of the University of Illinois Hospital and to students in the Spring 1985 interdisciplinary health care team building course. Objectives for 1985/86 are to maintain and evaluate the current services and improve, promote and develop clinical extension services to better serve the hospitals and clinics. Patient education/consumer health information files were updated and expanded. Library faculty prepared bibliographies of health information resources for the public which were published in a special issue of *Illinois Libraries*. These and other bibliographies, fact sheets, poster, and pamphlets in English and Spanish are included in the files. Objectives for next year include collecting additional Spanish and pictorial materials, increasing visibility of the collection, and creating an in-house database to enhance access.

*Documents* - Despite the lack of a documents librarian for most of 1984/85, routine work continued and several special projects were completed thanks to the efforts of support staff and reference librarians. Verification and weeding of withdrawn/cancelled titles was accomplished. A new listing of duplicate titles was prepared for selection by branch librarians. Order files were reorganized and updating of agency order files was started. An inventory of the NTIS microfiche collection was completed. The clinical information services coordinator assumed responsibility for maintaining the patient education files previously maintained by documents. Projects for 1985/86 include eliminating the cataloging backlog, continuing the updating of the agency file, and shelf reading/inventory of the print collection.

Margaret M. Ovitsky  
Head, Information Services Department

## INTERLIBRARY LOAN DEPARTMENT

The goal of the Interlibrary Loan Department continues to be the provision of more timely service to the faculty, students, and staff of the University of Illinois at Chicago.

The Department acquired an IBM Personal Computer to use for electronically transmitting ILL requests, verifying citations online, and formatting the Copyright Compliance Report. A program for formatting and editing TELEX requests more rapidly and economically was developed as well. The creation of a single regional locator tool containing merged holdings information for 22 Resource Libraries in the Region, and the

acquisition of a second NLM computer password helped to expedite the processing of requests.

The volume of Interlibrary Loan traffic increased slightly overall. The percentage of requests filled continued to increase this year as a result of the ability of the ILL staff to verify erroneous and incomplete citations which would have been rejected otherwise.

This year the department became fully staffed for the first time in 3 years. A program to sharpen the bibliographic skills of the staff, particularly the newest members, has begun. The Interlibrary Loan staff is to be commended for their ability to master new technologies while continuing to maintain the same high standards in their work.

New networks and resources promise to improve turnaround time next year. The Library is a participant in the Illinois State Library's LSCA grant supported telefacsimile network. The project is designed to enhance document delivery and resource sharing within Illinois, especially for health science materials. The Department continues to serve as a test site for the newest version of the National Library of Medicine's electronic request transmission system, DOCLINE. The system is scheduled to expand into an interactive one that will automatically route requests among the Resource Libraries which the system identifies as owning the material sought.

An important resource for many unusual titles will be open to the Library of the Health Sciences for the first time next year. The Library of Health Sciences and the Main Library joined the Center for Research Libraries. The Center offers unlimited interlibrary loan service, and provides hard copies of journal issues rather than photocopies, which permits the Library to obtain articles from journals which are not owned or on order without violating the copyright law or CONTU guidelines.

Interlibrary Loan service to the British Library via OCLC becomes available next year. Electronic transmission of our requests to England will shorten the time it takes to obtain material from this important resource.

Kimberly Goldman  
Head, Interlibrary Loan

## SPECIAL COLLECTIONS

*Personnel/Administration* - While staffing remained stable, the expected appointment of an Archivist with responsibility for the Archives in both libraries did not take place.

This has implications for acquisition and processing of archival material and these are being reviewed. In February the MLA Archives were packed by MLA and shipped later to the National Library of Medicine after Manfred Wasserman of NLM assessed the material on an earlier visit.

*Acquisitions* - The most important book acquisition was the gift of ten rare books of the 16th to 18th centuries by Dr. William Beck. His gift was valued at \$17,925; a list of the books is attached. Special effort was made to acquire four books in dermatology through the Pusey Fund. Most of the titles in Garland's American Nursing Series were acquired. The Library was given a collection of 67 titles in urology by the widow of Dr. Irving Shapiro. These were reviewed by Dr. Kiefer and valued at \$3,455. About half were identified by Dr. Kiefer for retention in Special Collections. Transfers of material to the University Archives are detailed in the statistical part of this report. These include the files of Helen Grace, former dean of Nursing, further deposits of Dr. Kiefer's papers, and files from the former Medical Center Senate Office. In March the Library received from NLM a copy of their videodisc pilot project to test this technology for access to the NLM picture collection. A total of eleven oral history transcripts have been received from MLA.

*Use of the Collections* - Faculty, including Drs. Sugar, Nelson, Kiefer, Stone and Mujais, made repeated use of the holdings for their publication research. Doctors from Rush, the University of Chicago, Pennsylvania, and Yeshiva used the collections, as did personnel from other institutions and affiliates.

Long-term research assistance was provided to Dr. Sheldon Cohen of the National Institutes of Health for his work on the establishment of the first interdisciplinary allergy unit at Illinois, resulting in his visit and donation of material. Reference material was provided and art work loaned to NLM for their current exhibit on Tom Jones after Biaggio Melloni, the guest curator, visited in December to arrange the loan. The photographic collections continue to be heavily used by outside sources as well as numerous campus offices and publications, and increasingly for the Chancellor's office.

*Control of the Collection* - In March a project to provide for duplication of the departmental catalog and development of a shelf list was submitted in response to administrative call for special student projects. No response has been received to date. The inventory of the collection remains a high

priority since some titles remain unlocated, including Pre-Fire imprints.

*Physical Facilities and Environmental Controls* - At times temperatures in the department ranged from 53 to 90 degrees, and a memorandum was prepared. A project to refine the heating system has resulted in fairly constant temperatures. A new leak slightly damaged almost two dozen folio volumes. There have been no leaks since a major repair of the roof.

*Exhibits* - The Library and the College of Pharmacy displayed the very successful exhibit of the Parke-Davis Collection of Paintings in the History of Pharmacy. Other exhibits were in honor of Pharmacy's 125th anniversary, a display of the Beck gift for the first all-campus Alumni Day, an exhibit for the Health Sciences Center Auxiliary, and one for the dedication of the Lions of Illinois Eye Research Institute, with a case on Dr. Casey Wood.

*Departmental Goals for 1985-86* - Last year's report looked to three goals: (1) to work closely with the new archivist, (2) to tighten access to departmental stacks and define user access to materials, and (3) to develop a systematic approach to acquisitions. Some progress was made but more can be done, and these goals remain viable areas for further work. Experience with patrons and the collections have spotlighted some problem areas and possible solutions, including a reader register for controlling use of the book collections. Finally, the awareness gained about faculty, readers, collections, funds, and information sources should help provide an intelligent basis for collection building.

Robert J. Adelsperger  
Curator of Special Collections

## PEORIA BRANCH LIBRARY

The Branch librarian began maternity leave in June, 1984, and subsequently resigned from the University effective October 1, 1984. The Associate University Librarian for the Health Sciences for Public Services assumed direct supervision of the Peoria Branch Library in June, 1984, and has been in the Branch Library one day per week throughout the year. The situation, perforce, has been difficult for all involved.

The Library has functioned extremely well and has been responsive to community needs during the interim management. The basic operation of the Library continued in a smooth fashion; administrative linkage with

the Peoria School of Medicine was maintained on a sound, working level; effort was made to establish a direct avenue for communicating with and seeking the advice of the student body through the Student Government Organization via infrequent, but regular meetings; important spadework was begun in pursuit of a more sophisticated library education program (to encompass the use of microcomputers); and two sections of the Library (circulation and serials) were reorganized into one section under one supervisor for efficient of operation and supervision. Concerted effort was made, with considerable success, to bring the reference collection up-to-date.

The Library acquired search access to OCLC and full access to PHILSOM. To date, except for a few problem titles, active and inactive serial titles have been entered into PHILSOM. The system is working well and will offer invaluable assistance to the Library's operation.

Considerable physical reorganization of the Library has taken place. In order to ease the crowding of the existent public catalog, the Library acquired additional catalog units which will allow growth space for several years. In order to accommodate the addition of the catalog units, the entire reference reading area was reorganized resulting in a more attractive, inviting study area which is already being used more heavily than previously.

The Technical Services Office has been reorganized for more efficient use as well as to accommodate the installation of an IBM personal computer and a second LCS station.

The Library will be participating in the statewide telefacsimile program sponsored by the State Library of Illinois. To that end, the Interlibrary Loan office is being reorganized and wired in order to install the equipment once it arrives.

The Library has identified periods of heavy use by the Students and has implemented a policy which reserves a large part of the reading area for use by UICOMP students only during those periods. The policy has been well received.

#### PRIORITIES FOR FY 86

To improve the relationship with the Faculty and Students of the College of Medicine and to find mechanisms to further involve them in certain Library operations.

To develop and implement a more sophisticated library education program, to include microcomputer applications. This endeavor has the support of Peoria School of Medicine Administration. The next logical step is to work with the Office of Academic Affairs and

members of the Faculty to design a program which would be more closely integrated into the total academic experience.

To focus on collection development -- particularly in the area of monographs, but not to overlook the general area of Document Delivery. It is highly desirable to have Faculty and Students play a more active role in advising the Library in terms of types and levels of materials which should be acquired. Mechanisms must be identified and implemented which will activate such a process. This, used in conjunction with the Coordinated-/Cooperative Collection Development data acquired through the Illinois Valley Library System study, and applications of PHILSOM and OCLC can only result in a stronger, more effective collection and a more responsive operation in meeting the needs of the community the Library serves.

Finally, the successful operation of the Library during this difficult time is, in large part, due to an understanding, cooperative Library Staff and the considerable support of the Peoria School of Medicine Administration.

John N. Theall  
Acting Head, Peoria Branch Library

#### ROCKFORD BRANCH LIBRARY

Major goals of the 1984-1985 fiscal year were: (1) reorganize for improved work flow; (2) implement PHILSOM, OCLC, ILLTRANS, and other computer systems; (3) develop and improve the library curriculum for M2 students; and (4) successfully test market the MEDLEXIS concept (MEDical Library EXTension Information Services).

Toward the first goal, the third professional position at Rockford was reinstated. Christine Rouze was hired June 25 as Information Services Librarian, and Ellani Abate began in September as Circulation/Serials Librarian. Ms. Rouze received intensive training from her predecessor and BRS online training during her first week on the job. Interlibrary Loan, Reference, and searching were placed under the Information Services Librarian. Microcomputers were brought increasingly into the day-to-day operation of the library. A new IBM PC was added for general access, and a COMPAQ portable allows work generated on the PC to be taken home in evenings and on weekends. The second LCS port was upgraded with a CRT.

The second goal was accomplished and exceeded in several ways. OCLC and PHILSOM have been implemented and incorporated into the work flow of the branch.

Serials conversion is progressing smoothly, albeit slowly due to staffing shortages. ILLTRANS version 3.0 was implemented, tested, and used for referral months; it has been subsequently replaced with version 4.0, operating unassisted during evening hours. A microcomputer laboratory was secured through a \$10,000 administrative grant, allowing an IBM PC and an Apple IIe to be installed for end user training and access. The memory size of all machines has been increased to 512 kb. A 20 megabyte hard disk and letter quality printer were added. Access was obtained to WILSONLINE and TELEX.

The third goal was achieved through a re-design of the M2 curriculum into a Medical Information Management course. This involved self-paced individualized learning (SPIL) modules, pre- and post-tests, and optional projects. The tests have been validated statistically and correlate well with MCAT scores and undergraduate grade point averages. It was also shown that taking the SPIL's had a statistically significant beneficial effect on test scores. The MIM course will be continued next year.

The MEDLEXIS concept was tested with Woodstock Memorial Hospital. The results after eight months are that the hospital finds the services worth paying for and worth continuing. The method of securing such agreements has yet to be finalized, but either a contract or a "membership" approach seems likely.

Goals for next year include: (1) the maintenance of services despite a major staff turnover (including the Branch Librarian's position); (2) the successful assimilation of the UICOMR media collection into the library; and (3) the creation of an electronic bulletin board for the health care community in Rockford.

Stuart J. Kolner  
Head, Rockford Branch Library

#### URBANA BRANCH LIBRARY

As with other libraries across the country the Urbana Branch Library is faced with two major tasks. The Library must automate more of its services and must also become a training ground for users of our information technology. This requires the acquisition of equipment and software to handle information and a staff trained in using and dispensing health information regardless of its form.

During the past year the Staff has devoted itself to working in these two areas. Numerous pieces of computer equipment were

added to the Library and the staff installed and learned to use the new equipment. During the winter the serial staff was trained in using the PHILSOM System and online periodical control system based at Washington University in St. Louis, Mo. Conversion of the serial records into PHILSOM began during the Spring Semester and should be completed in the Summer.

In the Spring acquisition staff was trained and provided input to the use of the OCLC Acquisition Subsystem. This system permits Staff to monitor current book orders and to locate bibliographic information for reference and acquisition questions regarding particular book titles or authors. This system has greatly improved our management of monographic acquisition records and appears to decrease the time required to obtain monographic materials.

The Library was again fortunate to see a 12.8% increase in the acquisition budget. To accommodate the increased collection size a total of 1620 linear feet of shelving was added to the Library. The College of Nursing through the Adult Health Nursing Grant gave 900 linear feet and the College of Medicine gave an additional 720 linear feet of shelving. Primarily this shelving will house journals as this is now the fastest growing part of the library collection. An additional 900 square feet of study space was added to the second floor of the Library to help offset the space required by the additional shelving.

As part of its strategic planning process the Library Staff developed an evaluation questionnaire and distributed it in April to students and faculty of the Colleges of Medicine and Nursing. Early results demonstrate satisfaction in library services and personnel and mild dissatisfaction with physical facilities. The major complaints relate to inadequate individual and group study space and lighting in the library.

The major goal for FY 86 for the Urbana Branch Library is the replacement of the Assistant Health Sciences Librarian. The Assistant Health Sciences Librarian is the key individual in the provision of reference and computer search services and bibliographic instruction. The Urbana Branch Library has always had an excellent reputation for quality reference service but fears that until this vacancy is filled users will not be as satisfied as in past years.

The Library has made a commitment with the College of Medicine, Clinical Education Center at Mercy Hospital to conduct a pilot project in teaching the Basics of Searching MEDLINE to the Internal Medicine Clerks. This program not only permits us to interact

with students and faculty during the clinical years, but gives us valuable teaching experience in enduser training of those individuals wishing to conduct their own computer literature searching. In addition to this project the library staff will conduct numerous 8 hour training programs to teach local health professionals how to search MEDLINE. While this can be seen as an overextension of personnel at this time, it is a need that the National Library of Medicine has identified and passed on to local medical librarians. Thus, the microcomputer revolution and the desire for enduser searching requires a closer examination and an extension of our library education programs not a cut back. The year ahead holds much excitement for and changes at the Urbana Branch Library.

Phyllis C. Self  
Head, Urbana Branch Library

## GREATER MIDWEST REGIONAL MEDICAL LIBRARY NETWORK

*Resource Library Directors.* The Directors met on April 1 to decide whether to form a resource libraries group. The decision was to meet twice yearly, but not to organize as a formal group.

*Regional Council.* The Regional Council met April 2 at the LHS.

*RML Directors Meeting.* The RML Director and the Associate RML Director attended RML Directors meetings on November 28-29 at the University of Maryland and on May 26, in New York City.

*Document Delivery.* The Interlibrary Loan Committee prepared "The GMRMLN Interlibrary Loan Manual" addendum which was distributed with the October 3 Sources, and (2) continued its 3 Sources column which discussed specific ILL procedures or current ILL topics. The LHS continued its testing of DOCLINE.

*Exhibits.* GMRMLN exhibited at the American Student Medical Association.

*Technology Applications Committee.* The Committee (1) designed and distributed 2,210 technology surveys; 1,258 were returned (58%) and tabulated by the Campus Research Survey Laboratory, and (2) designed the GMRMLN Technology Clearinghouse with an initial input of six hundred thirty-seven records. In February the Committee surveyed end user access and end user training. Results were published in 3 Sources.

*Collection Development.* The 1984 \$25,000 RML funding stimulated forty-four

proposals (\$222,645), five were funded (\$23,668). In 1985, \$30,000 is available to Region 3 through the same mechanism.

*Online Services.* NLM Initial training classes were held at: (1) Wayne State University, (2) Geauga Hospital (Cleveland), (3) LHS, and (4) St. Mary's Graduate Center (Minneapolis). Eleven NLM online updates were offered including a searchers clinic, a telephone update and a television update.

*GMRMLN Serials Exchange Pilot Study.* Five Resource Libraries participated in a three-phase serials exchange study involving a database system which allowed the merging of several datafiles. Distribution was via Ontyme-II, diskette and paper copy.

*End User Training.* "Teaching Medline to the Health Professional" was offered at the Library of the Health Sciences in December.

*Library Directories.* Data entry forms for updating each state's libraries directory were mailed out in the April 3 Sources.

*Underserved.* "Resource Awareness for End Users" was presented to the Jennings County Medical Society, North Vernon, IN, in November. "Basics of Online Searching for the Health Professional" was offered to South Dakota health professionals in June in conjunction with the University of South Dakota. In North Dakota, consultations, a workshop and a WATS line were used to contact health professionals.

*Regional Online Union Catalog.* The Regional Council voted to remount the database at BRS expense. Quarterly usage statistics were collected. Collection studies were begun in June. The database has 186,055 records and 275,916 holdings statements.

*Personnel.* Rikki Horne resigned to pursue business interests. Jane Jurgens joined the Management Office as an intern in April.

Ruby May  
Associate Regional  
Medical Library Director

*Teaching*

Robert J. Adelsperger

Nursing 290: History of Nursing. Lecture sessions on historical method and bibliographic instruction. Fall and Winter quarters, 1984-85.

Terri Licari

"Using Computerized and Manual Indexing and Abstracting Resources for Educational Research" CED ED 311 course. January 24, 1985.

Faculty team member, University of Illinois Interdisciplinary Seminar in Teambuilding and Teamcare. Spring quarter 1985.

Patricia E. Pinkowski

Presentation of the "1985 NLM Online Services Update Program" at the following locations:

Michigan Health Science Libraries Association Annual Education Conference, Flint, Michigan, October 12, 1984.

GMRMLN Online Update Clinic, Cedar Rapids, Iowa, October 24, 1984.

Medical Library Association/Northeastern, Ohio, Cleveland, Ohio, November 1, 1984.

Mid-Ohio Health Science Librarians, Columbus, Ohio, November 2, 1984.

University of North Dakota, Fargo, North Dakota, November 6, 1984.

Twin Cities Biomedical Consortium, Minneapolis, Minnesota, November 7, 1984.

Metropolitan Consortium, Chicago, Illinois, November 9, 1984.

University of Louisville, Louisville, Kentucky, November 13, 1984.

Wisconsin Educational Teleconference Network, November 15, 1984.

Southeastern Wisconsin Health Science Libraries Consortium, Waukesha, Wisconsin, November 16, 1984.

Indiana Medical Television Network, November 29, 1984.

"Basics of Teaching Medline to the Health Professional" was taught on the following occasions:

January 31, University of Illinois/Chicago  
February 8, University of Illinois/Chicago  
February 14-15, University of Illinois/Chicago

April 19, University of Illinois/Chicago

April 24-25, University of Illinois/Chicago

May 16, University of Illinois/Chicago

June 22, Sioux Falls, South Dakota

Phyllis C. Self

"Personal Information Files using Professional Bibliographic System" February 1985.

"The Basics of Searching MEDLINE: A Course for the Health Professional," June 11, 1985.

"Teaching the Basics of Searching MEDLINE: A course for Internal Medicine Clerks, A Pilot Study." Began June 26, 1985.

Wieslawa Tylman

MEDLINE Workshop for Health Professionals. January 31, February 8, 14, 15, April 12, 24, 25, May 16, 1985.

*Continuing Education*

Robert J. Adelsperger

"Workshop on Preservation and Conservation of Library Materials." University of Chicago. Sponsored by the Midwest Cooperative Conservation Program and the University of Chicago, October 16, 1984.

Cathleen M. Collett

"Law Materials for the Non-law Librarian"--Suburban Library Systems  
"Writing Collection Development and Weeding Policies" -- Chicago Public Libraries

Terri Licari

BRS Introductory System Training Session. University of Illinois at Chicago. September 26, 1984.

Mary Jo Lynch Research Seminar. University of Illinois at Chicago. October 11, 1984.

Medline Update. Children's Hospital, Chicago, Illinois. November 9, 1984.

NLM Initial Online Services Training Modules I, II, III. Conducted by the Midcontinental Regional Medical Library Program. University of Illinois. March 11-15, 1985.

Pergamon Online Training. University of Illinois at Chicago. April 23, 1985.

BRS Full Text System Training Course. BRS, Chicago, Illinois. April 10, 1985.

Patient Education Continuing Education Course, C.E. 636. Medical Library Association, Farmington Hills, Michigan. April 17, 1985.

Managing Student Employees Workshop. University of Illinois, Office of Organizational Development. June 1985.

Patricia Pinkowski

International Pharmaceutical Abstracts Workshop, Chicago, May 20, 1985.

Pergamon Infoline Training, Chicago, April 3-4, 1985.

Teaching Medline to the Health Professional, National Library of Medicine, Bethesda, Maryland, September 20, 1984.

Technical Resource Person Update, National Library of Medicine, Bethesda, Maryland, September 19, 1984.

## Phyllis C. Self

- "Computers in Health Sciences Education: Present Opportunities and Future Potentials." Sponsored by the PLATO Health Sciences Network, Department of Medical Information Science, University of Illinois College of Medicine, Urbana, IL, September 19-20, 1984.
- "Seminars on Research" with Mary Jo Lynch. Sponsored by the University Center Library, Chicago, IL, October 11, 1984.
- "1985 NLM Online Services Update Clinic." Sponsored by the Greater Midwest Regional Medical Library Network, Cedar Rapids, IA, October 23, 1984 (8.4 contact hours MLA C.E.U.)
- "Using a Database Management Package." Sponsored by Computing Services Office, Urbana, IL, November 5-8, 1984.
- "Teaching MEDLINE to the Health Care Professional: A Course for Search Intermediaries." Sponsored by the National Library of Medicine, Held at Cornell Medical College, New York, June 1985.

## Wieslawa Tylman

- BRS Update, LHS at Chicago, July 1984.
- "On-line searching with micros" Workshop, Dialog Office at Chicago, August 1984.
- Seminar on Research given by Mary Jo Lynch, Chicago, October 1984.
- NLM Update, Cedar Rapids, October 1984.
- Predicast Seminar, Dialog Office at Chicago, November 1984.
- "Teaching Medline to Health Professionals" Workshop, Chicago, December 1984.
- Computer Seminar - University of Illinois Communication Channel, Chicago, March 1985.
- Microcomputer Index/Business Software Seminar, Dialog Office at Chicago, March 1985.
- Pergamon-Infoline Workshop, LHS April 1985.
- Pergamon-Patents Workshop, LHS, April 1985.
- Introduction to Dialog Version 2, Dialog Office at Chicago, April 1985.
- BRS Full-text Workshop, BRS Office at Chicago, April 1985.
- PsychoInfo Workshop, Northwestern University Library in Evanston, April 1985.
- NEXIS, presentation of the new system, IS Dept., LHS, April 1985.

## Anne E. White

- BRS Introductory Training Course. University of Illinois at Chicago, Library of the Health Sciences. Chicago, Illinois. July 14, 1984

- Workshop "Getting documents to your people: An introduction to government publications." Sponsored by the Government Documents Roundtable of the Illinois Library Association. University of Illinois at Chicago, Main Library. Chicago, Illinois. October 5, 1984.
- "CMS for MVS Users", a workshop offered by the Computer Science Facility, University of Illinois at Chicago. Chicago, Illinois. December 10,12,13, 1984.
- Workshop on the use of SCRIPT and electronic mail offered by Main Library Librarians University of Illinois at Chicago, Chicago, Illinois. March 19,21, 1985.

## Consulting

## Terri Licari

- Consultant to the University of Illinois Patient/Client Education Implementation. Subcommittee for the development of a computerized indexing system for patient education materials at the University of Illinois Hospital.
- Consulted with Loyola University regarding the establishment of a patient education resource center.

## Staff Publications

- Deena C. Butta  
"Alternative Therapies." *Illinois Libraries* 67 (1985): 337-350.
